

**The German Red Cross is part of the world's largest humanitarian movement, providing assistance without discrimination as to nationality, race, religious beliefs, class or political opinion. The movement's mission is to improve the lives of vulnerable people – who are those most affected by natural disasters, poverty brought about by socioeconomic crises, civil unrest, international armed conflicts or health emergencies such as epidemics. As an expert for rehabilitation and habitat, you can help us fulfil this mission.**

The German Red Cross is constantly searching for qualified personnel for short and long-term missions.

"Short-term" can mean going on an emergency response mission with modular relief material or conducting a reconstruction and habitat assessment prior to a long-term project.

"Long-term" assignments can include the design and management of programs aimed at providing flood-proof, windproof and earthquake-resistant housing and/or the provision of shelter and assistance to the local population in improving their preparedness for the event of future natural disasters.

Meet you on mission ...

**Your mission:**  
To take care of basic housing  
and/or reconstruction and habitat  
programs for vulnerable people

## Reconstruction / habitat related profiles in demand are:

- building engineers
- architects
- preferably with community involvement and mobilisation expertise

## Application procedure and staffing:

Staffing for GRC missions is an ad hoc process due to the limited planning possibilities in emergency and development work.

The German Red Cross therefore has a pool of interested and pre-trained professionals who will be asked if they are ready to leave at short notice when required.

If you would like to be part of this pool, you should apply to the GRC and join the recruitment procedure.

## Our minimum requirements are:

- medical status "fit to work in the tropics"
- 2-3 years of professional experience
- thorough proficiency in English
- acceptance of the fundamental Red Cross principles
- intercultural sensitivity
- communication and representation skills

## Employment Conditions:

When assigned to a project, you will be given a fixed term contract with the GRC. People with a steady job can ask their employer for temporary leave at the expense of the GRC.

The GRC provides training and briefing for all delegates leaving on mission.

We also provide a special insurance package to your benefit for the time of your assignment abroad.

Furthermore, the GRC will provide accommodation and per diems during missions.

Please note that family postings are usually not available.
